

Environmental and Sustainability Policy

Enviroflor is a company committed to best practice in its approach to managing the environmental impacts associated with its business operations. It is our intention to consult and work with our clients and supply chain partners to provide end users and other key stakeholders with agreed innovative environmental solutions.

We will continually assess the effects on the environment in all our business processes to ensure that we leave the most responsible environmental legacy for future generations.

In order to achieve and ultimately surpass our environmental aspirations we will deliver through an Environmental management system (EMS). The protocols embodied therein will:

- Ensure we comply with all legal and other requirements.
- Consider all social impacts on the community and promote the ideals of the Considerate Contractor Scheme
- Consider all environmental impacts at all stages within our business
- Prevent pollution and protect the natural and built environment
- Use materials efficiently and set continuous improvement targets to minimize waste
- Use green energy resources
- Handle, store and protect material stocks
- Procure materials with a lower environmental impact using the BRE Green Guide.
- Procure materials and labour resources locally & contribute to the local economy.
- Reduce the effects of noise, dust, disturbance and inconvenience arising from our activities
- Sign up to the Considerate Constructor Scheme on all our projects
- Procure materials responsibly to avoid exploitation of communities in developing countries.
- Engage with the local community on all issues we are responsible for and that affect them
- Respond promptly to any complaints from third parties
- Cherish our workforce
- Procure materials with high post consumer recycled content.
- Incorporate energy reduction techniques including low and zero carbon technologies.
- Ensure staff are appropriately trained on environmental issues associated with the Company
- Continually improve on environmental performance and achieve challenging and innovative targets.
- Reviewed annually and updated as required.

This policy will be available to everyone via our company website and will always be communicated to our clients as part of any bid process to reinforce our environmental intent

Signed:

Geoff Houldridge
